

Damm Distribución Integral select Voice Picking solution developed by a Portuguese company.

Barcelona, February 12, 2021

DDI (Damm Distribución Integral) and CodeOne are implementing the voice picking solution integrated in SAP in its biggest Distributors, allowing to reduce time and errors in warehouse operations and consequently increase efficiency and productivity.

DDI are committed to embracing new business strategies driven by emerging technologies. Digitalisation is one of the fundamental pillars of this strategy, to make the company increasingly agile, efficient, and committed. It was in this context that DDI looked for a partner to unify a voice picking solution for its distributors. After a hard evaluation work, DDI select CodeOne Voice Picking solution to interface with SAP WM for this critical and demanding picking process.

DDI chose to work with CodeOne as a partner for the implementation of this project, due to the wide operational knowledge in this area, the experience demonstrated in identical processes, as well as their ability to convert this know-how into a solution technological.

It proved that it was the right bet, not only for the exceptional and robust solution, but also for collaboration in process improvements.

The solution implemented resulted from a team effort in which CodeOne applied the best practices to the SAP teams regarding the CodeOne Voice Solution.

For António Guedes, Business Manager at CodeOne, "The DDI Project was undoubtedly a factor of valorisation, which allowed CodeOne to continue the international projection of Voice solutions in the optimization of the Picking process in warehouses.

One of the factors of success in this project was undoubtedly the synergy created between the teams of these two companies. The experience acquired over the years in innovation and new technologies has allowed Codeone to carry out an exhaustive work in analysis and planning, until the results culminated in the Client's objectives: reduced time and increased productivity and therefore profitability for the Company. After this experience, we look forward to collaborating with DDI on other projects".

The selection of DDI to go ahead with CodeOne for this project, is the international recognition of this solution "made in Portugal".
